

Trust Electronic Remittance Report Automation

TERRA

Realizing the Benefits of Simplifying Remittance

Eliminate Overages and Shortages

TERRA simplifies the remittance process for the contractor by removing the need for them to provide complex calculations. The employer can simply enter the hours worked through an easy to use web-interface. A detailed report is generated for the hours entered and calculations are instantly performed showing the contractor exactly what they need to remit in payment. Overages and shortages are eliminated.

Reduce Errors from Mis-entry

Data exports directly from the reports generated by TERRA are customized to a Comma Separated Value (CSV) file to fit the import requirements of your administration software. This process removes the need for manual re-entry of eligibility hours, and greatly reduces the chance of re-entry error.

Web-Based Retrieval Tools

TERRA leverages integration with Laserfiche®, a powerful document management system, that provides an online vault of previous remittance reports. With powerful search tools, full text indexing and template field searches, people can quickly find exactly what they want to locate. Whether an auditor is searching for reports, or a contractor is trying to find his payment confirmation from previous months, Laserfiche® provides search tools to help reduce additional overhead that can bog down administrators.

- Simplify remittance for contractors
- Eliminate overages and shortages
- Reduce re-entry of eligibility information
- Online Secure Web-based Remittance Vault

Our services cover many areas and we rely on the fact that we can find the right solutions for installations, integrating systems and peripherals, training, and creating unique customizations. Please contact us for more information and client references.
